Re: Amherst Island Wind Project – Building Permit 2016-0308 (“Permit”)

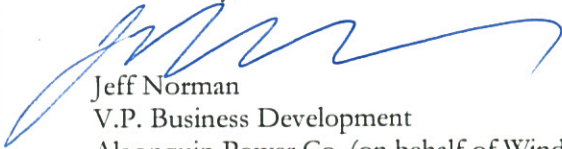

Dear Mr. Beckel;

This letter is in response to your December 15, 2016 letter regarding the Permit. We are concerned about the suggestion or implication in your letter that incorrect information was provided for the Permit, and that Windlectric Inc. has not complied or will not comply with law. That is not the case. For example, in terms of the CPU, the Qualified Person (of AECOM) has confirmed that the work on the mainland, such as the temporary dock that is the subject of the Permit, is not restricted by the CPU and can be done in compliance with the CPU.

Please note, that Windlectric Inc. has complied with applicable laws, and will continue to do so. This includes compliance with the Environmental Protection Act, and the Certificate of Property Use that was issued for the South Parcel (the CPU). If you have any basis for suggesting that Windlectric Inc. has not complied with or will not comply with law, please let me know immediately. Otherwise, we request that you withdraw your letter as we are concerned that your letter may have caused, and may continue to cause, significant harm and damage to Windlectric Inc. We also would be pleased to meet with you to discuss this, at your convenience.

Please feel free to contact the Ariel Bautista, Senior Project Manager at 289-981-0171 (cell) or Sean Fairfield at 905-465-4518.

Yours Truly,

Jeff Norman
V.P. Business Development
Algonquin Power Co. (on behalf of Windlectric, Inc.)
