NOTICE - DEMOLITION

TO ALL RESIDENTS ON OLD WILTON ROAD ODESSA

The former Odessa Water Treatment Plant, located at 42 Old Wilton Road, is scheduled to be decommissioned. That includes demolition of the three buildings inside the fence, regrading of the surface and seeding of the disturbed area.

The work is scheduled to start on October 29, 2009. The estimated duration of the project is 4 weeks. We are expecting a completion date of November 30, 2009. Everything is planned so residents feel the least disturbance, but expect heavy machinery traffic on the road and typical noise for this kind of activity.

The ultimate goal is to convert the lot into a Park for the enjoyment of the public. An environmental site assessment will be conducted once the demolition is completed. The site has already been confirmed free of asbestos based on inspection completed earlier this year.

Should you have any questions concerning the described work please contact Rafael Campos, Project Coordinator (613) 386-7351 ext 102
